| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | FACS, IF, IHC-P                                                                                                                                                                                                                                               |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | A GST fusion protein containing the N-terminal portion of Nucleophosmin fused to a 14 amino acid portion of ALK protein was used as the immunogen for the Nucleophosmin antibody.                                                                             |
| Product Description        | Recognizes a 33kDa glycoprotein, identified as Nucleophosmin (NPM). It is predominantly localized in the nucleus of cells in most tissues. NPM is involved in ribosomal assembly and rRNA transport. It is an abundant protein that is highly phosphorylat... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [NA24]                                                                                                                                                                                                                                                        |
| UniProt                    | <a href="#">P06748</a>                                                                                                                                                                                                                                        |
| Purity                     | Protein G affinity chromatography                                                                                                                                                                                                                             |

|                    |                                                                                                                         |
|--------------------|-------------------------------------------------------------------------------------------------------------------------|
| Form               | 1 mg/ml in 1X PBS, BSA free, sodium azide free                                                                          |
| Antibody Type      | Primary Antibody                                                                                                        |
| Application Dilute | Immunohistochemistry (FFPE): 1-2ug/ml for 30 min at RT,Flow cytometry: 1-2ug/million cells,Immunofluorescence: 1-2ug/ml |
| Application Notes  | Optimal dilution of the Nucleophosmin antibody should be determined by the researcher.                                  |
