| Category                   | Biochemikalien                                                                                                                                                                                                                                           |
| Product Description        | 2-NH <sub>2</sub> -ATP (2-Amino-2-deoxyadenosine-5-triphosphate) tetrasodium, an adenosine derivative, is a weak competitive inhibitor of ATP, with a K <sub>i</sub> of 2.3 mM. 2-NH <sub>2</sub> -ATP can be used in nucleic acid labeling[1][2][3].... |
| Molecular Weight           | 594.12                                                                                                                                                                                                                                                   |
| Formula                    | C <sub>10</sub> H <sub>13</sub> N <sub>6</sub> Na <sub>4</sub> O <sub>12</sub> P <sub>3</sub>                                                                                                                                                            |
| Target                     | Biochemical Assay Reagents                                                                                                                                                                                                                               |
| Application Notes          | MCE Product type: Reference compound                                                                                                                                                                                                                     |
