| Category                   | Biochemikalien                                                                                                                                            |
| Product Description        | Cis-Lenalidomide-CO-Ph-N2-Ph-O-C4-Cl is a synthetic E3 ligand-connector conjugate that can be used for the synthesis of Azo-PROTAC-4C-cis (HY-180985).... |
| Molecular Weight           | 588.01                                                                                                                                                    |
| Formula                    | C30H26ClN5O6                                                                                                                                              |
| Target                     | E3 Ligase Ligand-Linker Conjugates                                                                                                                        |
| Application Notes          | MCE Product type: Reference compound                                                                                                                      |
