Product Datasheet

Human NEB(Noradrenaline Bitartas) ELISA Kit EBT-ELK0075

Article Name	Human NEB(Noradrenaline Bitartas) ELISA Kit
Biozol Catalog Number	EBT-ELK0075
Supplier Catalog Number	ELK0075
Alternative Catalog Number	EBT-ELK0075-96, EBT-ELK0075-48, EBT-ELK0075-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	400 ng/mL
Range	6.25-400 ng/mL
Sensitivity	2.1 ng/mL
Samples	Serum, plasma, other biological fluids

Application Notes

Assay Type: Competitive Inhibition. Assay length: 3.5h. Research Area: Signal Transduction. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human NEB. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NEB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human NEB in the samples is then determined by comparing the OD of the samples to the standard curve
