EasyStep Human FE(Ferritin) ELISA Kit EBT-ELK017ES

Article Name	EasyStep Human FE(Ferritin) ELISA Kit
Biozol Catalog Number	EBT-ELK017ES
Supplier Catalog Number	ELK017ES
Alternative Catalog Number	EBT-ELK017ES-96, EBT-ELK017ES-48, EBT-ELK017ES-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	20 ng/mL
Range	0.32-20 ng/mL
Sensitivity	3.2 pg/mL
Samples	Serum

Application Notes

Assay Type: Sandwich. Assay length: 1.5h. Research Area: Metabolic pathway, Tumor immunity, Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human FE, and the Human FE standard plate wells that pre-coated using protein-related techniques are provided separately. Standard/Sample Diluent Buffer or samples are added to the appropriate microtiter plate wells, then added a HRP-conjugated antibody specific to Human FE. After TMB substrate solution is added, only those wells that contain Human FE and HRP-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human FE in the samples is then determined by comparing the OD of the samples to the standard curve
