## Product Datasheet

### Human MN(Metanephrine) ELISA Kit EBT-ELK0239

Article Name	Human MN(Metanephrine) ELISA Kit
Biozol Catalog Number	EBT-ELK0239
Supplier Catalog Number	ELK0239
Alternative Catalog Number	EBT-ELK0239-96, EBT-ELK0239-48, EBT-ELK0239-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	1000 pg/mL
Range	15.63-1000 pg/mL
Sensitivity	6.1 pg/mL
Samples	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Competitive Inhibition. Assay length: 3.5h. Research Area: Signal transduction, Infection immunity, Neuro science, Hormone metabolism, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human MN. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human MN. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human MN in the samples is then determined by comparing the OD of the samples to the standard curve
