Product Datasheet

Human NKX2-5(NK2 Homeobox 5) ELISA Kit EBT-ELK0416

Article Name	Human NKX2-5(NK2 Homeobox 5) ELISA Kit
Biozol Catalog Number	EBT-ELK0416
Supplier Catalog Number	ELK0416
Alternative Catalog Number	EBT-ELK0416-96, EBT-ELK0416-48, EBT-ELK0416-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	5000 pg/mL
Range	78.13-5000 pg/mL
Sensitivity	21.4 pg/mL
UniProt	P52952
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human NKX2-5. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NKX2-5. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human NKX2-5, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human NKX2-5 in the samples is then determined by comparing the OD of the samples to the standard curve</p>
