Product Datasheet

Rabbit MyD88(Myeloid Differentiation Factor 88) ELISA Kit EBT-ELK0585

Article Name	Rabbit MyD88(Myeloid Differentiation Factor 88) ELISA Kit
Biozol Catalog Number	EBT-ELK0585
Supplier Catalog Number	ELK0585
Alternative Catalog Number	EBT-ELK0585-96, EBT-ELK0585-48, EBT-ELK0585-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rabbit
Concentration	4000 pg/mL
Range	62.5-4000 pg/mL
Sensitivity	20.4 pg/mL
Samples	Tissue homogenates, cell lysates and other biological fluids.

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,CD & Adhesion molecule,Tumor immunity,Pulmonology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rabbit MyD88. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rabbit MyD88. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rabbit MyD88, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rabbit MyD88 in the samples is then determined by comparing the OD of the samples to the standard curve
