Product Datasheet

Human Anti-AChR(Anti-Acetylcholine Receptor Antibody) ELISA Kit EBT-ELK0781

Article Name	Human Anti-AChR(Anti-Acetylcholine Receptor Antibody) ELISA Kit
Biozol Catalog Number	EBT-ELK0781
Supplier Catalog Number	ELK0781
Alternative Catalog Number	EBT-ELK0781-96, EBT-ELK0781-48, EBT-ELK0781-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	100 ng/mL
Range	1.57-100 ng/mL
Sensitivity	0.68 ng/mL
Samples	Serum, plasma, tissue homogenates, cell lysates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Infection immunity, Neuro science, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human Anti-AChR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human Anti-AChR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human Anti-AChR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human Anti-AChR in the samples is then determined by comparing the OD of the samples to the standard curve
