Product Datasheet

Human Anti-FOLR(folate receptor autoantibodies IgG) ELISA Kit EBT-ELK0865

Article Name	Human Anti-FOLR(folate receptor autoantibodies IgG) ELISA Kit
Biozol Catalog Number	EBT-ELK0865
Supplier Catalog Number	ELK0865
Alternative Catalog Number	EBT-ELK0865-96, EBT-ELK0865-48, EBT-ELK0865-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	500 ng/mL
Range	7.82-500 ng/mL
Sensitivity	3.3 ng/mL
Samples	tissue homogenates, cell lysates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human Anti-FOLR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human Anti-FOLR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human Anti-FOLR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human Anti-FOLR in the samples is then determined by comparing the OD of the samples to the standard curve
