Cattle VA(Vitamin A) ELISA Kit EBT-ELK0951

| | |
|----------------------------|--|
| Article Name | Cattle VA(Vitamin A) ELISA Kit |
| Biozol Catalog Number | EBT-ELK0951 |
| Supplier Catalog Number | ELK0951 |
| Alternative Catalog Number | EBT-ELK0951-96, EBT-ELK0951-48, EBT-ELK0951-96X5 |
| Manufacturer | ELK Biotechnology |
| Category | Kits/Assays |
| Species Reactivity | Bovine |
| Concentration | 100 ng/mL |
| Range | 1.57-100 ng/mL |
| Sensitivity | 0.55 ng/mL |
| Samples | serum, plasma, cell lysates, cell culture supernates and other biological fluids |

Application Notes

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Metabolic pathway, Endocrinology, Hormone metabolism,. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Cattle VA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle VA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle VA in the samples is then determined by comparing the OD of the samples to the standard curve
