## Product Datasheet

### Rat NCAM(Neural Cell Adhesion Molecule) Microsample ELISA Kit EBT-ELK10129MS

Article Name	Rat NCAM(Neural Cell Adhesion Molecule) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK10129MS
Supplier Catalog Number	ELK10129MS
Alternative Catalog Number	EBT-ELK10129MS-96, EBT-ELK10129MS-48, EBT-ELK10129MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	500 ng/mL
Range	7.81-500 ng/mL
Sensitivity	0.37 ng/mL
UniProt	<a href="#">P13596</a>
Samples	Serum, plasma, tissue homogenates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule, Tumor immunity, Neuro science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat NCAM. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat NCAM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat NCAM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat NCAM in the samples is then determined by comparing the OD of the samples to the standard curve
