Product Datasheet

Horse BDNF(Brain Derived Neurotrophic Factor) ELISA Kit EBT-ELK10132

Article Name	Horse BDNF(Brain Derived Neurotrophic Factor) ELISA Kit
Biozol Catalog Number	EBT-ELK10132
Supplier Catalog Number	ELK10132
Alternative Catalog Number	EBT-ELK10132-96, EBT-ELK10132-48, EBT-ELK10132-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Equine
Concentration	10 ng/mL
Range	0.16-10 ng/mL
Sensitivity	0.058 ng/mL
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Infection immunity, Neuro science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Horse BDNF. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Horse BDNF. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Horse BDNF, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Horse BDNF in the samples is then determined by comparing the OD of the samples to the standard curve
