Product Datasheet

Human PARC(Pulmonary Activation Regulated Chemokine) ELISA Kit EBT-ELK10202

Article Name	Human PARC(Pulmonary Activation Regulated Chemokine) ELISA Kit
Biozol Catalog Number	EBT-ELK10202
Supplier Catalog Number	ELK10202
Alternative Catalog Number	EBT-ELK10202-96, EBT-ELK10202-48, EBT-ELK10202-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	200 ng/mL
Range	3.13-200 ng/mL
Sensitivity	1.13 ng/mL
UniProt	P55774
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine,.
Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human PARC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human PARC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human PARC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human PARC in the samples is then determined by comparing the OD of the samples to the standard curve
