Product Datasheet

Rat IgA(Immunoglobulin A) ELISA Kit EBT-ELK10456

Article Name	Rat IgA(Immunoglobulin A) ELISA Kit
Biozol Catalog Number	EBT-ELK10456
Supplier Catalog Number	ELK10456
Alternative Catalog Number	EBT-ELK10456-96, EBT-ELK10456-48, EBT-ELK10456-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	200 µg/mL
Range	3.13-200 µg/mL
Sensitivity	0.97 µg/mL
Samples	serum, plasma and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity, Immune molecule, Hematology, Pulmonology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat IgA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat IgA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat IgA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat IgA in the samples is then determined by comparing the OD of the samples to the standard curve
