Product Datasheet

Chicken ADP(Adiponectin) ELISA Kit EBT-ELK10514

Article Name	Chicken ADP(Adiponectin) ELISA Kit
Biozol Catalog Number	EBT-ELK10514
Supplier Catalog Number	ELK10514
Alternative Catalog Number	EBT-ELK10514-96, EBT-ELK10514-96X5, EBT-ELK10514-48
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Gallus
Concentration	500 ng/mL
Range	7.82-500 ng/mL
Sensitivity	4.75 ng/mL
Samples	serum, plasma and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Infection immunity, Cardiovascular biology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Chicken ADP. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Chicken ADP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Chicken ADP, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Chicken ADP in the samples is then determined by comparing the OD of the samples to the standard curve
