Mouse FE(Ferritin) ELISA Kit EBT-ELK10631

Article Name	Mouse FE(Ferritin) ELISA Kit
Biozol Catalog Number	EBT-ELK10631
Supplier Catalog Number	ELK10631
Alternative Catalog Number	EBT-ELK10631-96, EBT-ELK10631-96X5, EBT-ELK10631-48
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Mouse
Concentration	500 ng/mL
Range	7.81-500 ng/mL
Sensitivity	0.112 ng/mL
UniProt	P29391
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Tumor immunity, Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse FE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse FE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse FE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse FE in the samples is then determined by comparing the OD of the samples to the standard curve
