## Product Datasheet

### Human IFNb(Interferon Beta) ELISA Kit EBT-ELK1101

Article Name	Human IFNb(Interferon Beta) ELISA Kit
Biozol Catalog Number	EBT-ELK1101
Supplier Catalog Number	ELK1101
Alternative Catalog Number	EBT-ELK1101-96, EBT-ELK1101-48, EBT-ELK1101-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	500 pg/mL
Range	7.82-500 pg/mL
Sensitivity	2.8 pg/mL
UniProt	<a href="#">P01574</a>
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine,Tumor immunity,Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human IFN<math>\gamma</math>. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human IFN<math>\gamma</math>. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human IFN<math>\gamma</math>, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm <math>\pm</math> 10nm. The concentration of Human IFN<math>\gamma</math> in the samples is then determined by comparing the OD of the samples to the standard curve</p>
