Product Datasheet

Dog APOE(Apolipoprotein E) ELISA Kit EBT-ELK11172

Article Name	Dog APOE(Apolipoprotein E) ELISA Kit
Biozol Catalog Number	EBT-ELK11172
Supplier Catalog Number	ELK11172
Alternative Catalog Number	EBT-ELK11172-96, EBT-ELK11172-48, EBT-ELK11172-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Canine
Concentration	5000 ng/mL
Range	78.13-5000 ng/mL
Sensitivity	46.7 ng/mL
UniProt	P18649
Samples	Serum, plasma and other biological fluids.

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Cardiovascular biology, Hepatology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Dog APOE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Dog APOE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Dog APOE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Dog APOE in the samples is then determined by comparing the OD of the samples to the standard curve
