## Product Datasheet

### Goat E-Cad(E-Cadherin) ELISA Kit EBT-ELK11194

|                            |  |
|----------------------------|--|
| Article Name               | Goat E-Cad(E-Cadherin) ELISA Kit                                     |
| Biozol Catalog Number      | EBT-ELK11194   |
| Supplier Catalog Number    | ELK11194   |
| Alternative Catalog Number | EBT-ELK11194-96, EBT-ELK11194-48, EBT-ELK11194-96X5                  |
| Manufacturer               | ELK Biotechnology  |
| Category                   | Kits/Assays  |
| Species Reactivity         | Goat   |
| Concentration              | 20 ng/mL   |
| Range                      | 0.32-20 ng/mL  |
| Sensitivity                | 0.121 ng/mL  |
| Samples                    | serum, plasma, urine, tissue homogenates and other biological fluids |

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule, Tumor immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Goat E-Cad. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Goat E-Cad. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Goat E-Cad, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Goat E-Cad in the samples is then determined by comparing the OD of the samples to the standard curve
