Rabbit sC5b-9(Soluble Terminal Complement Complex C5b-9) ELISA Kit EBT-ELK11213

| | |
|----------------------------|--|
| Article Name | Rabbit sC5b-9(Soluble Terminal Complement Complex C5b-9) ELISA Kit |
| Biozol Catalog Number | EBT-ELK11213 |
| Supplier Catalog Number | ELK11213 |
| Alternative Catalog Number | EBT-ELK11213-96, EBT-ELK11213-48, EBT-ELK11213-96X5 |
| Manufacturer | ELK Biotechnology |
| Category | Kits/Assays |
| Species Reactivity | Rabbit |
| Concentration | 2000 ng/mL |
| Range | 31.25-2000 ng/mL |
| Sensitivity | 12.8 ng/mL |
| Samples | serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids |

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Immunology, Metabolism, Signal Transduction. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rabbit sC5b-9. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rabbit sC5b-9. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rabbit sC5b-9, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rabbit sC5b-9 in the samples is then determined by comparing the OD of the samples to the standard curve
