Product Datasheet

Human SPB(Surfactant Associated Protein B) ELISA Kit EBT-ELK1771

Article Name	Human SPB(Surfactant Associated Protein B) ELISA Kit
Biozol Catalog Number	EBT-ELK1771
Supplier Catalog Number	ELK1771
Alternative Catalog Number	EBT-ELK1771-96, EBT-ELK1771-48, EBT-ELK1771-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	100 ng/mL
Range	1.57-100 ng/mL
Sensitivity	0.6 ng/mL
UniProt	P07988
Samples	serum, plasma, lung lavage fluid, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Tumor immunity, Infection immunity, Pulmonology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SPB. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SPB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SPB, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human SPB in the samples is then determined by comparing the OD of the samples to the standard curve
