Product Datasheet

Human VGF(VGF Nerve Growth Factor Inducible) Microsample ELISA Kit EBT-ELK1798MS

Article Name	Human VGF(VGF Nerve Growth Factor Inducible) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK1798MS
Supplier Catalog Number	ELK1798MS
Alternative Catalog Number	EBT-ELK1798MS-96, EBT-ELK1798MS-48, EBT-ELK1798MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	5000 pg/mL
Range	78.13-5000 pg/mL
Sensitivity	27 pg/mL
Samples	serum, plasma, cerebrospinal fluid and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Infection immunity, Neuro science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human VGF. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human VGF. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human VGF, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human VGF in the samples is then determined by comparing the OD of the samples to the standard curve
