Product Datasheet

Human LMWK(Low Molecular Weight Kininogen) ELISA Kit EBT-ELK1799

Article Name	Human LMWK(Low Molecular Weight Kininogen) ELISA Kit
Biozol Catalog Number	EBT-ELK1799
Supplier Catalog Number	ELK1799
Alternative Catalog Number	EBT-ELK1799-96, EBT-ELK1799-48, EBT-ELK1799-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	400 ng/mL
Range	6.25-400 ng/mL
Sensitivity	2.99 ng/mL
Samples	Plasma.

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Metabolic pathway, Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human LMWK. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human LMWK. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human LMWK, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human LMWK in the samples is then determined by comparing the OD of the samples to the standard curve
