### Human FcgRII(Receptor II For The Fc Region Of Immunoglobulin G) Microsample ELISA Kit EBT-ELK2071MS

Article Name	Human FcgRII(Receptor II For The Fc Region Of Immunoglobulin G) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK2071MS
Supplier Catalog Number	ELK2071MS
Alternative Catalog Number	EBT-ELK2071MS-96, EBT-ELK2071MS-48, EBT-ELK2071MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	3000 pg/mL
Range	46.88-3000 pg/mL
Sensitivity	17.39 pg/mL
Samples	serum, plasma and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule, Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human FcγRII. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human FcγRII. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human FcγRII, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Human FcγRII in the samples is then determined by comparing the OD of the samples to the standard curve
