Product Datasheet

Rat CD14(Cluster Of Differentiation 14) Microsample ELISA Kit EBT-ELK2116MS

Article Name	Rat CD14(Cluster Of Differentiation 14) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK2116MS
Supplier Catalog Number	ELK2116MS
Alternative Catalog Number	EBT-ELK2116MS-96, EBT-ELK2116MS-48, EBT-ELK2116MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	4000 pg/mL
Range	62.5-4000 pg/mL
Sensitivity	29.1 pg/mL
UniProt	Q63691
Samples	serum, plasma, tissue homogenates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: CD & Adhesion molecule, Tumor immunity, Infection immunity, Immune molecule,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat CD14. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat CD14. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat CD14, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat CD14 in the samples is then determined by comparing the OD of the samples to the standard curve
