Human NF-kappaBp105(Nuclear factor NF-kappa-B p105 subunit) ELISA Kit EBT-ELK2228

| | |
|----------------------------|---|
| Article Name | Human NF-kappaBp105(Nuclear factor NF-kappa-B p105 subunit) ELISA Kit |
| Biozol Catalog Number | EBT-ELK2228 |
| Supplier Catalog Number | ELK2228 |
| Alternative Catalog Number | EBT-ELK2228-96, EBT-ELK2228-48, EBT-ELK2228-96X5 |
| Manufacturer | ELK Biotechnology |
| Category | Kits/Assays |
| Species Reactivity | Human |
| Concentration | 10 ng/mL |
| Range | 0.16-10 ng/mL |
| Sensitivity | 0.056 ng/mL |
| UniProt | P19838 |
| Samples | tissue homogenates, cell lysates, cell culture supernates and other biological fluids |

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human NF-kappaBp105. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NF-kappaBp105. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human NF-kappaBp105, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human NF-kappaBp105 in the samples is then determined by comparing the OD of the samples to the standard curve
