## Product Datasheet

### Human CFI(Complement Factor I) ELISA Kit EBT-ELK2800

Article Name	Human CFI(Complement Factor I) ELISA Kit
Biozol Catalog Number	EBT-ELK2800
Supplier Catalog Number	ELK2800
Alternative Catalog Number	EBT-ELK2800-96, EBT-ELK2800-48, EBT-ELK2800-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	10 ng/mL
Range	0.16-10 ng/mL
Sensitivity	0.072 ng/mL
UniProt	<a href="#">P05156</a>
Samples	Serum, plasma and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Immune molecule, Hematology, Autoimmunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human CFI. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human CFI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human CFI, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human CFI in the samples is then determined by comparing the OD of the samples to the standard curve
