Product Datasheet

Human HEPH(Hephaestin) ELISA Kit EBT-ELK4180

Article Name	Human HEPH(Hephaestin) ELISA Kit
Biozol Catalog Number	EBT-ELK4180
Supplier Catalog Number	ELK4180
Alternative Catalog Number	EBT-ELK4180-96, EBT-ELK4180-48, EBT-ELK4180-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	100 ng/mL
Range	1.57-100 ng/mL
Sensitivity	0.58 ng/mL
UniProt	Q9BQS7
Samples	Serum, plasma, tissue homogenates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human HEPH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human HEPH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human HEPH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human HEPH in the samples is then determined by comparing the OD of the samples to the standard curve
