Product Datasheet

Cattle IgM(Immunoglobulin M) ELISA Kit EBT-ELK4256

Article Name	Cattle IgM(Immunoglobulin M) ELISA Kit
Biozol Catalog Number	EBT-ELK4256
Supplier Catalog Number	ELK4256
Alternative Catalog Number	EBT-ELK4256-96, EBT-ELK4256-96X5, EBT-ELK4256-48
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Bovine
Concentration	100 µg/mL
Range	1.57-100 µg/mL
Sensitivity	0.71 µg/mL
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity, Immune molecule, Hematology,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle IgM. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle IgM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle IgM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle IgM in the samples is then determined by comparing the OD of the samples to the standard curve
