Human IκBκ(Inhibitor Of Kappa-Light Polypeptide Gene Enhancer In B-Cells Kinase Beta) ELISA Kit EBT-ELK4383

Article Name	Human IκBκ(Inhibitor Of Kappa-Light Polypeptide Gene Enhancer In B-Cells Kinase Beta) ELISA Kit
Biozol Catalog Number	EBT-ELK4383
Supplier Catalog Number	ELK4383
Alternative Catalog Number	EBT-ELK4383-96, EBT-ELK4383-48, EBT-ELK4383-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	10 ng/mL
Range	0.16-10 ng/mL
Sensitivity	0.06 ng/mL
Samples	Tissue homogenates, cell lysates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Enzyme & Kinase,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human I κ BKb. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human I κ BKb. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human I κ BKb, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human I κ BKb in the samples is then determined by comparing the OD of the samples to the standard curve
