Product Datasheet

Human SIRPg(Signal Regulatory Protein Gamma) ELISA Kit EBT-ELK4553

Article Name	Human SIRPg(Signal Regulatory Protein Gamma) ELISA Kit
Biozol Catalog Number	EBT-ELK4553
Supplier Catalog Number	ELK4553
Alternative Catalog Number	EBT-ELK4553-96, EBT-ELK4553-48, EBT-ELK4553-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	10 ng/mL
Range	0.16-10 ng/mL
Sensitivity	0.064 ng/mL
UniProt	Q9P1W8
Samples	Tissue homogenates, cell lysates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SIRP γ . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SIRP γ . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SIRP γ , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Human SIRP γ in the samples is then determined by comparing the OD of the samples to the standard curve
