Product Datasheet

Rat MOG(Myelin Oligodendrocyte Glycoprotein) Microsample ELISA Kit EBT-ELK4563MS

Article Name	Rat MOG(Myelin Oligodendrocyte Glycoprotein) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK4563MS
Supplier Catalog Number	ELK4563MS
Alternative Catalog Number	EBT-ELK4563MS-96, EBT-ELK4563MS-48, EBT-ELK4563MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	10 ng/mL
Range	0.16-10 ng/mL
Sensitivity	0.051 ng/mL
UniProt	Q63345
Samples	Tissue homogenates and other biological fluids.

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Infection immunity, Neuro science, Genetic science, Autoimmunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat MOG. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat MOG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat MOG, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat MOG in the samples is then determined by comparing the OD of the samples to the standard curve
