Product Datasheet

Human TAP(Trypsinogen Activation Peptide) ELISA Kit EBT-ELK5019

Article Name	Human TAP(Trypsinogen Activation Peptide) ELISA Kit
Biozol Catalog Number	EBT-ELK5019
Supplier Catalog Number	ELK5019
Alternative Catalog Number	EBT-ELK5019-96, EBT-ELK5019-48, EBT-ELK5019-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	10000 pg/mL
Range	156.25-10000 pg/mL
Sensitivity	53.3 pg/mL
Samples	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Infection immunity, Immune molecule, Hepatology, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human TAP. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human TAP. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human TAP in the samples is then determined by comparing the OD of the samples to the standard curve
