Product Datasheet

Cattle IFN γ (Interferon Gamma) ELISA Kit EBT-ELK5646

Article Name	Cattle IFN γ (Interferon Gamma) ELISA Kit
Biozol Catalog Number	EBT-ELK5646
Supplier Catalog Number	ELK5646
Alternative Catalog Number	EBT-ELK5646-96, EBT-ELK5646-48, EBT-ELK5646-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Bovine
Concentration	1000 pg/mL
Range	15.63-1000 pg/mL
Sensitivity	6 pg/mL
UniProt	P07353
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Infection immunity, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle IFN γ . Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle IFN γ . Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle IFN γ , biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Cattle IFN γ in the samples is then determined by comparing the OD of the samples to the standard curve
