Product Datasheet

Rat TARC(Thymus Activation Regulated Chemokine) Microsample ELISA Kit EBT-ELK5672MS

Article Name	Rat TARC(Thymus Activation Regulated Chemokine) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK5672MS
Supplier Catalog Number	ELK5672MS
Alternative Catalog Number	EBT-ELK5672MS-96, EBT-ELK5672MS-48, EBT-ELK5672MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	1000 pg/mL
Range	15.63-1000 pg/mL
Sensitivity	6.1 pg/mL
Samples	Serum, plasma, tissue homogenates, cell lysates and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine, Tumor immunity, Infection immunity,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat TARC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat TARC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat TARC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of Rat TARC in the samples is then determined by comparing the OD of the samples to the standard curve
