Product Datasheet

Horse EPO(Erythropoietin) ELISA Kit EBT-ELK5972

Article Name	Horse EPO(Erythropoietin) ELISA Kit
Biozol Catalog Number	EBT-ELK5972
Supplier Catalog Number	ELK5972
Alternative Catalog Number	EBT-ELK5972-96, EBT-ELK5972-48, EBT-ELK5972-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Equine
Concentration	2000 pg/mL
Range	31.25-2000 pg/mL
Sensitivity	11.3 pg/mL
UniProt	Q867B1
Samples	Serum, plasma and other biological fluids

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine,Endocrinology,Hematology,Hormone metabolism,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Horse EPO. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Horse EPO. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Horse EPO, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Horse EPO in the samples is then determined by comparing the OD of the samples to the standard curve
