Product Datasheet

Rat MyoD(Myogenic Differentiation) Microsample ELISA Kit EBT-ELK6019MS

Article Name	Rat MyoD(Myogenic Differentiation) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK6019MS
Supplier Catalog Number	ELK6019MS
Alternative Catalog Number	EBT-ELK6019MS-96, EBT-ELK6019MS-48, EBT-ELK6019MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	5000 pg/mL
Range	78.13-5000 pg/mL
Sensitivity	27 pg/mL
UniProt	Q02346
Samples	Tissue homogenates, cell lysates and other biological fluids.

Application Notes

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Cardiovascular biology, Developmental science, Bone metabolism,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat MyoD. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat MyoD. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat MyoD, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat MyoD in the samples is then determined by comparing the OD of the samples to the standard curve
