## Product Datasheet

### **Cattle RANTES(Regulated On Activation In Normal T-Cell Expressed And Secreted) ELISA Kit EBT-ELK9153**

Article Name	Cattle RANTES(Regulated On Activation In Normal T-Cell Expressed And Secreted) ELISA Kit
Biozol Catalog Number	EBT-ELK9153
Supplier Catalog Number	ELK9153
Alternative Catalog Number	EBT-ELK9153-96, EBT-ELK9153-48, EBT-ELK9153-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Bovine
Concentration	200 ng/mL
Range	3.13-200 ng/mL
Sensitivity	1.33 ng/mL
Samples	Serum, plasma and other biological fluids.

Application Notes	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cytokine,Tumor immunity,Infection immunity,Immune molecule,.</p> <p>Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle RANTES. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle RANTES. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle RANTES, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle RANTES in the samples is then determined by comparing the OD of the samples to the standard curve</p>
