Product Datasheet

Human APC(Adenomatous polyposis coli) Microsample ELISA Kit EBT-ELK9156MS

Article Name	Human APC(Adenomatous polyposis coli) Microsample ELISA Kit
Biozol Catalog Number	EBT-ELK9156MS
Supplier Catalog Number	ELK9156MS
Alternative Catalog Number	EBT-ELK9156MS-96, EBT-ELK9156MS-48, EBT-ELK9156MS-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Human
Concentration	1000 pg/mL
Range	15.63-1000 pg/mL
Sensitivity	5.5 pg/mL
UniProt	P25054
Samples	Serum, plasma, tissue homogenates and other biological fluids

Application Notes	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cell Biology, Neuroscience, Epigenetics and Nuclear Signaling. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human APC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human APC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human APC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human APC in the samples is then determined by comparing the OD of the samples to the standard curve</p>
