Application Notes	<p>Assay Type: Sandwich. Assay length: 3.5h. Research Area: Cell Biology,Cancer, Metabolism. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse pMAPT/pTAU. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse pMAPT/pTAU. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse pMAPT/pTAU, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Mouse pMAPT/pTAU in the samples is then determined by comparing the OD of the samples to the standard curve</p>
