Rat EPI(Epinephrine/Adrenaline) ELISA Kit EBT-ELK9643

Article Name	Rat EPI(Epinephrine/Adrenaline) ELISA Kit
Biozol Catalog Number	EBT-ELK9643
Supplier Catalog Number	ELK9643
Alternative Catalog Number	EBT-ELK9643-96, EBT-ELK9643-48, EBT-ELK9643-96X5
Manufacturer	ELK Biotechnology
Category	Kits/Assays
Species Reactivity	Rat
Concentration	2000 pg/mL
Range	31.25-2000 pg/mL
Sensitivity	10.22 pg/mL
Samples	serum, plasma, cell lysates, cell culture supernates and other biological fluids

Application Notes	<p>Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Metabolic pathway, Infection immunity, Neuro science, Hormone metabolism, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Rat EPI. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat EPI. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat EPI in the samples is then determined by comparing the OD of the samples to the standard curve</p>
