## Product Datasheet

### Recombinant Human IFN gamma EBT-EPT166

Article Name	Recombinant Human IFN gamma
Biozol Catalog Number	EBT-EPT166
Supplier Catalog Number	EPT166
Alternative Catalog Number	EBT-EPT166-50
Manufacturer	ELK Biotechnology
Category	Proteine/Peptide
Product Description	Recombinant Human Interferon Gamma is produced by our Mammalian expression system and the target gene encoding Gln24-Gln166 is expressed....
Molecular Weight	Molecular weight: 16.8 KDa. Apparent molecular weight: 16&20&25 KDa, reducing conditions
UniProt	<a href="#">P01579</a>
Purity	Greater than 95% as determined by reducing SDS-PAGE.

Application Notes	<p>Redissolve: Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100µg/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.. Endotoxin: Less than 0.1 ng/µg (1 EU/µg) as determined by LAL test. Background: IFNgamma is the major interferon produced by mitogenically or antigenically stimulated lymphocytes. It is structurally different from type I interferon and its major activity is immunoregulation. It has been implicated in the expression of class II histocompatibility antigens in cells that do not normally produce them, leading to autoimmune disease. Interferon gamma is produced mainly by T-cells and natural killer cells activated by antigens, mitogens, or alloantigens. It is produced by lymphocytes expressing the surface antigens CD4 and CD8. IFNgamma synthesis is induced by IL-2, FGF-basic, and EGF</p>
