| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Octadecanaldehyde used in the preparation of new anti-HIV Molokalamine derivatives. Also used in the preparation of fluorescently labelled dynamic amphiphiles for analysis of transmembrane ion transport, sensing and cellular uptake. Melting Point: 43... |
| Molecular Weight           | 268.48                                                                                                                                                                                                                                                        |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                     |
| CAS Number                 | [638-66-4]                                                                                                                                                                                                                                                    |
