| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | A cell-permeable hydroxyindolinone compound that acts as a selective antagonist of survivin. Induces mitotic arrest and blocks cell cycle at G2/M phase (~40uM in HeLA cells) leading to apoptotic cell death. Shown to bind to a specific cavity adjacent... |
| Molecular Weight           | 390.2                                                                                                                                                                                                                                                         |
| Purity                     | ~98% (HPLC)                                                                                                                                                                                                                                                   |
| Form                       | Supplied as a white solid.                                                                                                                                                                                                                                    |
