| Species Reactivity         | Virus                                                                                                                                                                                                                                                                                                                                        |
| Immunogen                  | Immunogen was recombinant SARS-CoV-2 Nucleocapsid Protein derived from E.coli. This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with the immunogen. The IgG fraction of tissue culture supernatant was purified by Protein G/A affinity chromatography. |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                                                                                   |
