| Product Description        | This gene encodes a member of the guanine nucleotidebinding protein (G protein)coupled receptor (GPCR) superfamily, which is subdivided into classes and subtypes. The receptors are sevenpass transmembrane proteins that respond to extracellular cues a... |
| Molecular Weight           | 61.1 kDa                                                                                                                                                                                                                                                      |
| Tag                        | N-Flag & C-10*His                                                                                                                                                                                                                                             |
