| Product Description        | Dansyl-aniline is fluorescently labelled Aniline (A662475) which is used in the manufacture of dyes, medicinals, resins, varnishes, perfumes, as a vulcanizing rubber or even as a solvent. Molecular Formula: C <sub>18</sub> H <sub>18</sub> N <sub>2</sub> O <sub>2</sub> S Solubility: Chloroform, Ethyl A... |
| Molecular Weight           | 326.41                                                                                                                                                                                                                                                                                                            |
| Form                       | Supplied as a Pale Yellowish Green Solid                                                                                                                                                                                                                                                                          |
| CAS Number                 | [34532-47-3]                                                                                                                                                                                                                                                                                                      |
