| Product Description        | Fmoc-L-Tyr(tBu)-OH is tyrosine derivative used in solid phase peptide synthesis. Molecular Formula: C <sub>28</sub> H <sub>29</sub> NO <sub>5</sub> Molecular Weight: 459.53<br>Storage and Stability: Store at -20°C. For maximum recovery of product, centrifuge the original vial prior to removi... |
| Molecular Weight           | 459.53                                                                                                                                                                                                                                                                                                  |
