| Product Description        | Methyl 6-Bromo-6-deoxy-alpha-D-talopyranose is a substrate to a bacterial homologue of glucose transporters GLUT1-4. Molecular Formula: C <sub>7</sub> H <sub>13</sub> BrO <sub>5</sub> Solubility: Ethanol, Water Molecular Weight: 257.08 Storage and Stability: Store at -20C. For maximum re... |
| Molecular Weight           | 257.08                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                           |
